NOVEMBER 16

SEMINAR

2:30 P.M. - 3:30 P.M.

RECEPTION

with appetizers and refreshments

3.30 P.M. - 4.30 P.M

Ecological Homogenization of Urban America

Dr. Groffman is a leader in understanding the functioning of urban ecosystems. His work provides a template for understanding commonalities among urban ecosystems at the continental scale. His recent work is a prime example of a research program focused on Macrosystems Biology, a major focus of the National Science Foundation Biological Sciences Directorate.

During his career, he has authored over 300 publications, with more than 85 as primary author. Groffman was a Convening Lead Author for the 2013 U.S. National Climate Assessment Chapter on Ecosystems, Biodiversity and Ecosystem Services and a lead author for the Second (Wetlands) and Third (North America) Assessment Reports of the Intergovernmental Program on Climate Change (IPCC).
